

Professional trade show Hyvolution Paris

From 27 January to 29 January

HAROPA PORT will participate in the 2026 edition of the Hyvolution Paris exhibition, taking place from January 27 to 29 at Paris Expo Porte de Versailles. Dedicated to hydrogen professionals, the event will bring together companies, institutions, and sector experts to showcase the latest technological developments and market perspectives.

An event dedicated to hydrogen

The exhibition gathers **actors from hydrogen production, storage, transport, and applications**. Conferences and panel discussions will address topics such as infrastructure development, industrial applications, and regulations. Networking and exchange areas will also foster collaborations between companies, investors, and public decision-makers.

HAROPA PORT at the heart of the discussions

Facing decarbonization challenges, **ports see hydrogen as a key lever**. Port ecosystems offer multiple use cases, from port handling to maritime transport, as well as road and rail mobility, contributing to the energy transition of industrial activities.

To explore these issues, Kris Danaradjou, Director of Development at HAROPA PORT, will speak at the **conference “H2 and Green Corridors: Perspectives from Global Port Leaders”** on January 27 at 4:50 PM.

He will present the **numerous green hydrogen projects hosted by HAROPA PORT along the Seine axis** strengthening its role as a driving force in the hydrogen sector in France.

Practical Information

- **When:** January 27–29, 2026
- **Where:** Paris, Porte de Versailles
